*Learning Together
In Faith & Knowledge*

January 20, 2012

Dear Parent/Guardian;

In order to maintain a quality education for all students, Yellowknife Catholic Schools continuously reviews programming. This year the focus of the regular YCS Program Review is mathematics. It is very timely that mathematics is the focus of the current cycle as it correlates with the implementation of new curricula, which will be completed next year with grade 12 in September 2012.

We feel that it is important that all stakeholders participate in this review process so that, as we collect data to assess strengths and possible areas for improvement in the delivery of the new curriculum, we can work to ensure that the needs of all students are met. Information from parents is crucial to this process and we strongly encourage you to take a few minutes of your time to complete the survey. There are several ways in which access to the survey will be available, either on-line or in writing:

- Survey is available on-line at <http://www.surveymonkey.com/s/FHZ7FCC>
- Stations will be provided at three-way conferences on February 23rd and 24th
- Written copies will be available at three-way conferences on February 23rd and 24th
- You can request a copy to be sent home by phoning the school at 873-5591
- You can request a copy to be sent home by sending a note to your child's teacher
- You can access the link on our district website at www.ycs.nt.ca.
- Copies will be available at the front office

Surveys will be anonymous in nature unless you wish to include your name. If you would like the opportunity to speak to a program team member to express your ideas or concerns, please include your phone number. The mathematics program review team greatly appreciates your interest in the learning of mathematics. Together, we can help our children acquire the mathematics skills they will need when they enter their lives as young adults.

Sincerely,

Simone Gessler
Principal
